To whom It May Concern

Commissioner

I Would like to make a petition to make a special review of my patent application, application number 09/933,725. Under regulation 708.02 My invetion will help in the conservation of our natural resources. The building blocks formed by this machine are of common soil and thus a renewable resource. In addition, the energies require to produce a soil building block is considerably less than that of cement or fired building blocks.

Thank You For Your Consideration,

Steve Everett, Inventor
